

DORMANT WAREHOUSE SCALES.

PLATE 10.

FOR WAREHOUSES, MANUFACTORIES, OR RAILWAY STATIONS.—This is a new and very desirable modification of Scale, having a platform quite level with the floor, rendering it particularly convenient where merchandise is to be wheeled upon the Scale for weighing.

The weigh-beam is suspended from two iron pillars, and is arranged with our patent “trig loop” for preventing the wear of the beam-pivots while loading the Scale, and doing away with the use of the “drop-lever.”

Class.	Capacity.	Dimensions of Platform.	Price.
No. 1 . . .	5,000 lbs. . . .	48 × 48 inches . . .	\$
“ 4 . . .	3,500 “ . . .	41 × 43 “ . . .	“ . . .
